

New Charge to the NExTRAC

Lawrence A. Tabak, DDS, PhD
Principal Deputy Director, NIH

NExTRAC Meeting - June 25, 2021

Data Science and Emerging Technologies

2. For those questions/technologies, consult with stakeholders to discuss and assess the value of and potential implications for individuals, groups, and society, considering:

- Attitudes and perspectives about sharing participant data to advance biomedical research, specifically through the lens of balancing research risk (e.g., privacy, autonomy) with research deliverables
- How these perspectives may evolve depending on the context of who is to benefit or assume risk, whether it be at the individual level, through the community, or broader society's expectations for public health advancement

NExTRAC CHARGE

Data Science and Emerging Technologies
