Re: SERIOUSLY WHAT THE f [REDACTED] IS YOUR PROBLEM..

You're going to kill us all you stupid f [REDACTED] idiot.
Do the world a favor and please take yourself out of the gene pool.
Seriously, you are too f [REDACTED] stupid to live.
Just your very existence proves that there is no god.
I hope you get infected by your own genitally modified disease.
That way you can see what a f [REDACTED] [REDACTED] that you have become.
I say this whole heatedly..... f [REDACTED] your life

If it ever affects my family, I WILL FIND YOU.

I consider you are a War Criminal. When you get in bed with a dog, you get fleas. I know that most people don't yet understand what you are, but in a few years they will. The vaccine industry is killing the human race intentionally for their British Masters. You are just helping to speed it up. You should resign in disgrace immediately, but you probably won't. It doesn't matter. Now millions of us know who you really are and what you are up to. When the time comes, you will be given a fair trial in Nuremberg, Pennsylvania the new show Reality TV Grand Jury. The people at home will vote on what to do with you.

- Ease fears and concerns
- Discuss safety, security, and planning
- Correct misinformation

Biosecurity Threat Assessment

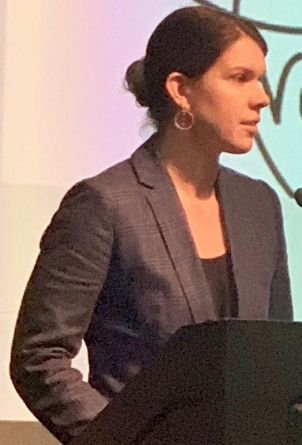

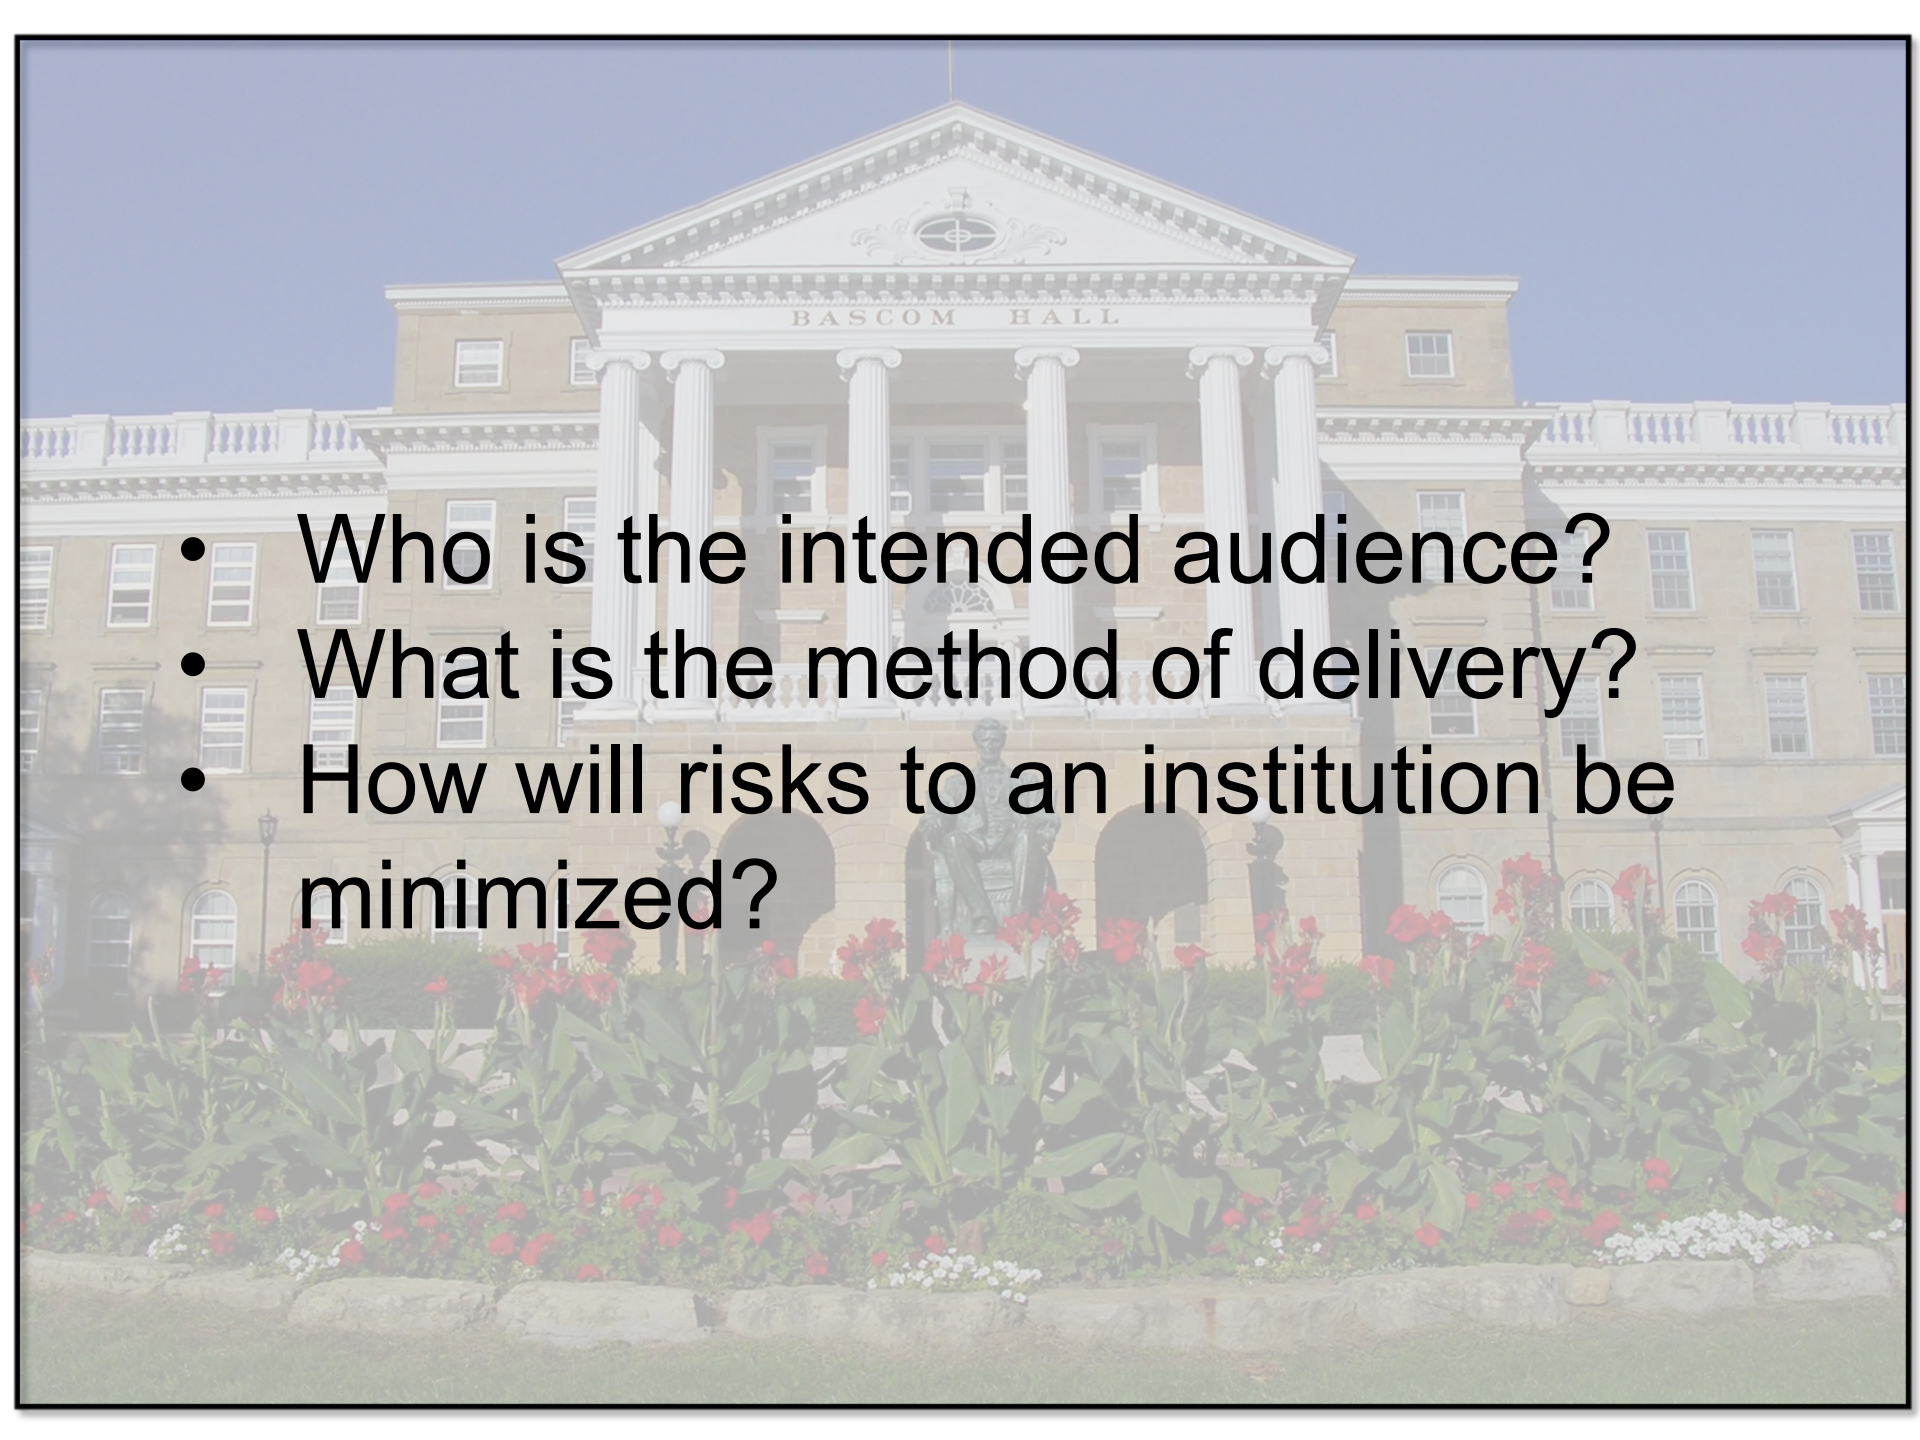

Photo by David Gillum:

- 
- The image shows the front facade of Bascom Hall, a large, classical-style building with a prominent portico supported by six white columns. The name "BASCOM HALL" is inscribed above the columns. In the foreground, there is a garden bed with large green plants and red flowers. A statue is visible in the center of the building's base. The text of the list is overlaid on the left side of the image.
- Who is the intended audience?
 - What is the method of delivery?
 - How will risks to an institution be minimized?
